

The Canny Collar – Measuring Guide

To find the best size of Canny Collar for your dog, consult the table below. The Canny Collar must fit snugly. It should be fastened so that it cannot slip over your dog's head. This will mean that it should be tighter than a conventional collar. You may need to choose a size down for bitches/smaller dogs or a size up for larger dogs. If in doubt, choose the smaller size.

To ensure a very accurate fit, take a tape and measure around your dog's neck snugly, to just behind the ears.

Use the following measurements to choose the correct size Canny Collar:

Neck Measurement		Collar Size	Breed Example Guide
23cm – 28cm	9" - 11"	Size 1	King Charles Cavalier
